Triage report

Case: INC-A787E11F2A22

Report status: Draft - not saved

Rule signal: BruteForce

Communication path: 172.16.0.1 -> 192.168.10.50

Observed (dataset clock): 2017-07-04T09:19:00 to 2017-07-04T10:19:00

Review priority: Low

1. AI assessment

Verdict: Likely Attack

Confidence: medium

The BruteForce rule reports 59 connections in one minute. Repeated connections to a login service warrant investigation; the flows do not establish failed logins or successful compromise. The behaviour is consistent with the BruteForce detection rule rather than with routine user activity, and it is supported by the cited flow records.

Limitations: Only a sample of the aggregated flows is retrievable through read-only tools; no packet payloads were inspected.

Finding 1: The BruteForce rule reports 59 connections in one minute. Repeated connections to a login service warrant investigation; the flows do not establish failed logins or successful compromise.

Evidence: FLOW-C633F74D8637, FLOW-55AC53DD2312

Finding 2: Sampled flow 172.16.0.1 to 192.168.10.50:21 carries 3.0 packets (evidence FLOW-C633F74D8637).

Evidence: FLOW-C633F74D8637

Finding 3: Sampled flow 172.16.0.1 to 192.168.10.50:21 carries 3.0 packets (evidence FLOW-55AC53DD2312).

Evidence: FLOW-55AC53DD2312

2. Supporting evidence

Assessment evidence: FLOW-C633F74D8637, FLOW-55AC53DD2312, FLOW-76181E5E3CCD

Available evidence: 61 alerts / 7,902 matched flows / 366 sample flows

MITRE ATT&CK proposal: Unmapped - The available flow records do not establish a specific ATT&CK technique.

Mapping evidence: ALT-9FE0D0887CB4

Rule matches and technique mappings are evidence-based signals, not confirmation of a successful attack.

3. Investigation plan and execution

Step 1: Review related network flows

Review decision: Not reviewed

Reason: Offline UI fixture: inspect these linked connection records before drawing a conclusion.

Evidence: FLOW-C633F74D8637

Execution: Not recorded

4. Investigation notes

Recorded by / at (UTC): AcceptanceTester / 2026-10-24T15:21:22.311576+00:00

Offline UI verification: confirm whether this activity was an authorized test.

5. Analyst review

Decision: pending

Reviewer: Not reviewed

Reviewed at (UTC): Not recorded

Review note: No note recorded

6. AI activity and validation

Run ID: TRG-63D091CE81

Started / completed (UTC): - / -

Evidence validation: Not recorded
